Blue Iris TECH CONSULTING

SBA 8(a) CERTIFIED

Where Federal Innovation Blooms

We modernize mission systems, secure critical operations, enable accessible workforces, and improve the way federal programs deliver results.

MISSION MODERNIZATION
Applications, automation, quality engineering, testing, release readiness, sustainment, and secure delivery.

MISSION OPERATIONS
Infrastructure, cyber compliance, health-system sustainment, force protection, governance, financial management, and coordination.

MISSION ENABLEMENT
Accessibility, assistive technology, training, outreach, user support, workforce services, and service-delivery improvement.

Core Competencies

Digital Modernization, Automation & Quality Engineering
Application modernization; Agile delivery; Java/REST API development; database/UI enhancements; QA/UAT/regression; test automation; accessibility validation; release readiness; documentation; user support.

Counterintelligence, Force Protection & Mission Assurance
Threat analysis; force-protection planning; counter-UAS strategy; policy/SOP development; training; executive briefings; intelligence integration; interagency coordination.

Secure Infrastructure & Cyber Compliance
Systems administration; cloud and virtual-environment support; RMF/ATO; STIGs; vulnerability remediation; security documentation; risk assessment; secure configuration; mission resilience.

Accessibility, Training & Workforce Enablement
Assistive technology; ergonomics; accessibility training; accessible communications; Section 508 support; Salesforce workflow support; national outreach; service delivery.

Health IT & Mission System Sustainment
Application operations; legacy modernization; user support; cyber compliance; incident response; technical documentation; data-migration planning; modernization transition support.

Program Operations, Governance & Financial Management
Tasker management; governance; reporting; records management; ServiceNow support; stakeholder coordination; financial execution; funds control; audit readiness; internal controls.

Differentiators

- SBA 8(a) certified and small business.
- Prime and subcontractor performance across defense and civilian agencies.
- Secure mission support with TS Facility Clearance and CMMC Level 2.
- Disciplined Agile delivery, documentation, testing, release support, and governance.
- Distinct accessibility and workforce enablement experience through nationwide services.
- Powered by our exceptional team who bring expertise, dependability, and a collaborative, people-first approach to every mission.

Past Performance

NIST | Prime
Modernization, sustainment, Java/REST APIs, quality engineering, test automation, accessibility, security-compliance support, release validation, and user support.

USDA | Prime
Nationwide accessibility, assistive technology, ergonomics, training, outreach, Salesforce workflows, and program operations.

DHA | Prime
DoD Health IT sustainment, application operations, user support, QA, cybersecurity compliance, documentation, and transition support.

Army Counterintelligence Command | Subcontractor
All-source analysis, counterintelligence, cyber threat analysis, collection support, and operational planning.

NCIS | Subcontractor
Operational strategy and desk-officer support for force protection, CI/CT integration, counter-UAS planning, training, policy, threat assessment, and coordination.

DTRA | Subcontractor
Senior systems administration supporting secure cyber mission environments and resilient, mission-ready infrastructure.

DLA | Subcontractor
Business systems analysis supporting enterprise engineering operations, workflow modernization, reporting, and automation planning.

Air Force | Subcontractor
Budget and financial management support advancing funds control, financial reporting, audit readiness, and mission accountability.
