

Where Federal Innovation Blooms

Blue Iris Tech Consulting is WBENC Certified, Woman Owned Small Business (WOSB) and SBA Certified 8(a) firm delivering innovative technology solutions for federal agencies. We specialize in delivering modern IT capability and management services that help leaders weather change, grow teams, and plan for what's next. With experience across multiple agencies, our clients trust us to cultivate and deliver solutions that matter to their mission.

Our Services

Artificial Intelligence (AI)

- Machine Learning
- Deep Learning
- Natural Language Processing

Health IT

- Applications Development
- Health Management Systems
- Operational Support

Program Management

- Project/Program Management
- Governance
- Data & Analytics

Counterintelligence (CI)

- Insider Threat
- Cybersecurity
- DevSecOps

Communications

- Change Management
- Meeting Facilitation
- Training

Strategic Advisory Services

- Strategic Planning
- Business Intelligence
- Quality Management

Enterprise IT

- Application Development
- Infrastructure Modernization
- Service & System Administration

Disability Support Services

- Comprehensive Training Development Programs
- Innovative Assistive Technologies Integration
- Expert Ergonomics Evaluations and Recommendations
- Engaging and Effective Training Facilitation
- Strategic Organizational Development Solutions

Our Clients

Past Performance

Enterprise IT/ Engineering Services:

National Aeronautics and Space Administration (NASA) – We provide digital services in engineering and technology management through our platform. Our platform helps manage program and technology portfolios, enhances communication and collaboration, and grants access to data for analysis and reporting. It serves as the primary interface for NASA and small business users, supporting day-to-day operations from solicitation development to contract administration and commercialization. We also offer operational, outreach, data analytics, reporting, and helpdesk support for the SBIR/STTR business processes.

Disability Support Services:

USDA Technology & Accessible Resources Give Employment Today (TARGET) Center – We lead ergonomics and assistive technology programs with daily evaluations and quarterly recommendations on innovative equipment to prevent workplace injuries. Monthly workshops focus on current workplace standards, offering accommodations for employees at risk of ergonomic injuries or involved in repetitive tasks. They provide assistive technology solutions for various disabilities, including blind/low vision, deaf or hard of hearing, cognitive disabilities, dexterity limitations, and hidden disabilities. Services include assessing and recommending communication solutions, offering resources and training on accessible communication, and facilitating services like sign language interpreting, Communication Access RealTime Translation (CART), and TypeWell transcription. Effective communication with individuals with disabilities is emphasized, and alternative formats of print communication support public information dissemination.

Counterintelligence (CI):

Defense Threat Reduction Agency (DTRA) - We are proud of our role in advancing the DTRA Insider Threat program, resulting in a 36% reduction in caseloads. Our expertise lies in identifying, assessing, and mitigating insider risks. Additionally, we excel in overseeing and managing unauthorized disclosures and integrating, managing, maturing, and professionalizing insider threat capabilities.

We played a crucial role in auditing and restructuring DTRA's inquiry, Badge, and Credentials programs. Our expertise is delivering authorized counterintelligence support, focusing on identifying, assessing, and disrupting threats posed by foreign intelligence entities to the trusted workforce and the cleared national industrial base.

Defense Intelligence Agency (DIA) – Contributed to developing the DIA counterintelligence training curriculum, which has been utilized to train over 3,000 Joint Agency Counterintelligence Special Agents.

Army's Counterintelligence Cyber Security and Investigation Unit – Established and activated the Army's Counterintelligence Cyber Security and Investigation Unit. Our efforts are instrumental in shaping and designing the future landscape of the Army's Counterintelligence Cyber Security initiatives.

Joint Venture Apexius, LLC

Digital Transformation

- Agile Development: Software Applications, Systems
- DevSecOps and Continuous
- Integration / Continuous
- Delivery (CI/CD)
- Applications and system Modernization
